### Authorship

I certify that I have made substantial contributions to (1) the conception and design or analysis and interpretation of data; (2) drafting or revising the manuscript critically for important intellectual content; and (3) final approval of the version to be published. All three of these conditions must be met. I further certify that I have participated sufficiently to take public responsibility for the work. I understand that acquisition of funding, collection of data, or general supervision of the research group by itself would not justify a claim of authorship. I affirm that the manuscript submitted is original and that neither this manuscript nor one with substantially similar content under my authorship has been published, nor is any such manuscript under consideration for publication elsewhere, except as described in an attachment. I understand that any report of secondary analyses of data sets should specify the source of the data.

I believe that the manuscript represents valid work. I have reviewed the final version of the submitted manuscript and approve it for publication. If requested, I will produce the data on which the manuscript is based for examination by the Editors or their designees.

### Copyright Transfer

In compliance with the Copyright Revision Act of 1976, I warrant that I have sole ownership of the work submitted, that the work is original and has never been published, and that I have full powers to grant such rights.

In consideration of APTA's journal, *Physical Therapy (PTJ)*, taking action in reviewing and editing the submission, I hereby transfer, assign, or otherwise convey all copyright ownership to APTA. In addition, I hereby grant APTA's journal, **PTJ**, the right to edit, revise, abridge, condense, and translate the foregoing work. I understand that I bear the responsibility for approving editorial changes. Copyright applies to publication in all print and electronic media.

### For NIH Grantees

If any of the authors have been supported financially by the National Institutes of Health (NIH) to conduct the research that is reported in this article or in related data supplements, **PTJ** will submit an electronic copy of the final published version on the authors' behalf to the NIH National Library of Medicine's (NLM) PubMed Central (PMC) before or soon after the time of publication (at the most, within 4 weeks after publication), as per **PTJ**'s Agreement for Participation in NIH PubMed Central (NIH Portfolio) Archive.

This certifies that I have been supported financially by the NIH to conduct the research that is reported in this article or other written work as specified above.
